

Humayun Imtiaz

Full-Stack Software Engineer MERN / PERN Stack • AI Integration

+92 305 4353847 | Humayunimtiaz81@gmail.com | Pakistan | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 2+ year of professional experience building scalable, user-facing web applications using MERN and PERN stacks. Proficient in Next.js, TypeScript, PostgreSQL, Prisma, Docker, Socket.io, and AI API integration (Google Gemini). Solid understanding of SDLC, OOP, REST API design, and Agile delivery. B.Sc. Software Engineering graduate with 3.51 GPA (Grade A).

EDUCATION

B.Sc. Software Engineering — KFUEIT, Rahim Yar Khan

CGPA: 3.51 / 4.0 (Grade A)

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), TypeScript, React.js, Next.js, Redux Toolkit

Backend: Node.js, Express.js, REST APIs, Socket.io, Webhooks, MVC Architecture,

Databases: MongoDB, PostgreSQL, Prisma ORM, Knex, Supabase, Neon

AI Integration: Google Gemini API, LLM Application Development, Prompt Engineering

Languages: JavaScript, TypeScript, C++, Python

Tools & DevOps: Docker, Git, GitHub, Vercel, VS Code, Render, Railway, Hugging face

Methodologies: Agile / Scrum, SDLC, OOP, Performance Optimization, Code Review

PROFESSIONAL EXPERIENCE

Software Engineer — Full-Stack | Virtue Netz

Jan 2025 – Present • Pakistan (On-site)

- Developed and deployed multiple production-grade apps using Next.js, TypeScript, PostgreSQL, Prisma, and Knex.
- Built LuxaCart (full-featured eCommerce) and Pettigo (pet services app) end-to-end.
- Architected real-time chat using Socket.io with concurrent session handling and optimized PostgreSQL via Supabase.
- Integrated Google Gemini API to build an AI-powered Resume & GitHub Profile Analyzer for automated insights.
- Integrated Webhooks for event-driven workflows; worked in Agile sprints with weekly code reviews on Vercel.

Full-Stack Software Engineering Internship — CMIT (Government-Certified)

Completed a government-certified full-stack software engineering internship program at CMIT, gaining hands-on industry experience in modern web development technologies and practices.

Teaching Assistant — C++ & Web Dev | KFUEIT

Sep 2022 – Jun 2024 • Rahim Yar Khan

- Guided 50+ students through OOP, Algorithms, and Data Structures; facilitated lab sessions.
- Reviewed and debugged React.js, JavaScript, and Node.js student projects with constructive feedback.

PROJECTS

E-Commerce Marketplace Platform Live Links : [Admin](#) | [Vendor](#) | [User](#) [View Documentation](#)

- Full-stack marketplace: Next.js, TypeScript, Node.js/Express (MVC), JWT auth, Formik/Yup, Multer, Cloudinary, Neon PostgreSQL + Prisma.
- Real-time features via Socket.io; separate Admin and User portals with role-based access control.

AI-Powered Resume & GitHub Analyzer [\[Live — Currently in Development\]](#)

[View Documentation](#)

- Built intelligent analysis tool using Google Gemini API for automated resume parsing and GitHub profile evaluation.
- Integrated LLM responses with Next.js/TypeScript frontend for real-time AI-generated feedback and scoring.

Additional: Restaurant Dining Experience [Live](#) Outfit Cart — Frontend E-Commerce [Live](#) | MovieLand — Movie Search [Live](#)

• Three frontend projects showcasing responsive UI design using React.js, Tailwind CSS, and third-party REST API integration.

Real-Time Chat Application [\[Live\]](#)

- Next.js + TypeScript frontend with Socket.io bi-directional messaging; Node.js/Express MVC backend.
- PostgreSQL (Supabase) with Knex query builder for efficient, scalable data management.

CERTIFICATIONS & TRAINING

Google AI Essentials — Coursera | Issued Apr 2026

- Earned Google AI Essentials certification via Coursera. Credential: [View Certificate](#)
